AsSec Digital Combination Locks

39e Digital Lock

Add up to 8 users and 1 manager code

The manager code enables basic reprogramming on site

The opening of the lock can be disabled even when a valid code is entered and all lock functions can be disabled even when a valid code is entered

The lock runs off a 9V battery pack fitted on the inside of the safe. However, there is an outside battery compartment on the underside of the keypad which enables the battery to be changed even when the safe is closed

The keypad offers constant feedback with a red flashing LED and beeping at every step of use or programming

Time delay period from 1 to 99 minutes and a window of opening from 1 to 19 minutes

On board non volatile memory that records the last 500 events including user ID and action

PC operated and easy to program with windows based software

A silent duress alarm signal is available when fitted with alarm box

Can be used on bulk safes, ATM room safes, key safes, The Citadel Drop Safe and tills

66e Digital Lock

Add up to 8 users and 1 manager code

The manager code enables basic reprogramming on site

The opening of the lock can be disabled even when a valid code is entered and all lock functions can be disabled even when a valid code is entered
