AsSec Pennine Cabinets A Range of High Security Cabinets

The AsSec Pennine range of high security cabinets has been designed and built to the highest standard to give you peace of mind when storing valuable items such as: money, drugs, mobile phones, laptops, computers and servers, cigarettes, firearms or keys.

Select from eight models to suit your individual security requirements. All the cabinets have three way moving bolt work with a fixed dog bar on the hinge side and anti jemmy door and body profiles. The lock is the type used on most commercial safes and a re-locker is attached to the lock to protect it if attempts are made to displace it, alternative locking arrangements are available. Hardened steel plates have been positioned over potential attack points.

The cabinets are pre drilled for wall and/or base fixing and are supplied each with 4 X M10 anchor bolts. There is a full range of fittings for the cabinets including: adjustable shelves, rollout shelves, rollout suspension frames, lockable compartments (single or multiple). Associated Security Services worked closely with the Home Office to develop and make available a full range of cabinets for the safe storage of controlled drugs and are pleased to announce that the eight models in the Pennine Range of cabinets passed the 'Sold Secure Silver' test.

Cash Rated to £4000

Valuables Rated to £40,000

(The Pennine Range of High Security Cabinets can be modified to Class 4 for Government use.)

The AsSec Pennine Range of high security cabinets has passed the Sold Secure 'Silver' test SS314 and the BS EN 14450: 2005 test. Insurance companies now rate this cabinet as a cash safe.
