AsSec Secure Data

Data Protection from Flame and Heat

Ever thought about what would happen if you had a fire and lost all of your computer data? Statistics show that more than 80% of all companies that lose their computer data are out of business in three months. The answer is to protect your valuable data with the Secure Data. The Secure Data is available in five models ranging from 45 to 200 litres. The safe gives full access to the extending shelves with the door open at an angle of only 90°. The door can be further opened up to a 125° angle maximum. Locking - The Secure Data Range is equipped with a high security double bitted key lock or user friendly electronic pin-code lock as standard. This high security electronic lock can store 2 user codes (6 digits). Both are Class A, EN 1300 / ECB•S approved. Certification range - The Secure Data range is certified to 120 Diskette according to NT Fire 017. This means that your data is protected even after being subjected to a fire lasting 2 hours. Due to the insulated walls and special seal system the internal temperature will not rise above 52°C.

Additional features - A slam action bolt work is used for easy and convenient closing and ensures full fire protection. This means you will not have to lock the door in order to be protected in a fire; just slam it! A multi-seal system provides water resistance as well as protection against moisture and gases. All models are equipped with a removable shelf or extending drawers. The drawers come with adjustable dividers to organise your data. The shelves and drawers can be placed in almost any position due to the sophisticated racking system.

AsSec Secure Doc Office

Data Protection from Flame and Heat

Are you looking for a cabinet that will protect your valuable documents from fire? Secure Doc Office is what you are looking for. It will protect your paper documents from severe fires. The Secure Doc Office range has a fire protection classification of 120 Paper, which means that documents stored in the cabinets will be protected against fire lasting 2 hours.

Statistics shows that more than 80% of all companies that have been exposed to a fire have reached bankruptcy within 3 years. The Secure Doc Office offers a very high fire protection for documents and ensures continuation of your business. Secure Doc Office is available in four models and specially designed for use in office environments. With its large capacity and removable shelves you will always be able to find the optimum storage configuration for binders and documents. Additionally a 'Combi' model is available which combines the storage of paper documents and data media. The safes are equipped with an electronic security lock with LCD display as standard. In addition to the normal user code (4-16 digits) the lock provides a master code, log event and antispy function. The Secure Doc Office range is tested in accordance with NT Fire 017 – 120 Paper, which means that your paper documents are protected even after being subjected to a fire lasting 2 hours. Due to the insulated wall the internal temperature will not raise above 177°C. The Combi-version offers 120 Paper label and 60 Diskette label, both according NT Fire 017.

Additional features - The models are provided with removable shelves as standard to maximize your storage capacity. Furthermore an optional special fire insert is available for storing data media, such as CD/DVD's, backup tapes, etc.
