Strongrooms & Safety Deposit Boxes

YOUR SECURITY IN OUR HANDS

AsSec's Prefabricated Strongrooms (PSR) are constructed from wall, roof and optional floor panels welded together.

The panels are produced with modern production technique and constructed with a new barrier material. The design of the PSR can easily be adopted to the conditions at site. AsSec's PSR is assembled in a short time and can easily be dismantled and used again

Burglary protection All types of PSR are certified in accordance with the European standard EN-1143-1.

Explosive test - EX - option AsSec's PSR in Grade VIII and X have also passed the explosive test and are certified as EX PSR.

Core Drill test - CD - option AsSec's PSR in Grade VIII and X have also passed the core drill test and are certified as CD PSR.

Ventilation The PSR can be fitted with a reinforced ventilation passage that has been accepted by the certification institute and which will be connected to a tube $\varnothing 150\text{mm}$.

Alarm and power supply There are 8 conduits ($\varnothing 18$) for power supply to lighting, alarm and safe deposit lockers.

Finish Strongroom Door - primed finish, Panels - outside, untreated finish, Panels - inside, painted with primer.

Safety Deposit boxes are an optional extra in your strongroom to allow individual storage of valuables.

Custom made to fit into your desired area, they operate under dual control to ensure the highest level of security for your items and are available as a free standing unit or to be fixated into the wall.

Design

- Made from high quality steel - 10mm
- Internal hinges enable a 95° opening angle
- Doors painted a medium grey and housing light grey as standard - other colours available on request
- Number plates are glued to the front of the boxes or engraved on request.

Locking

Each deposit box is operated by two keys.

- One customer key
- One bank employee key

Optional Extras

Mechanical key lock with electronic blockade, which replaces bank's key.

Available with various levels of security including frosting windows and access control systems
